

QUALITY POLICY

Global Environment Consultants Ltd. (GECL) is dedicated to being a leader in environmental inspection and monitoring services. Our commitment to quality is founded on the principles of technical accuracy, integrity, and absolute impartiality.

To achieve this, it is the policy of **GECL** to:

- **Adhere to International Standards:** Maintain a Quality Management System that meets the requirements of **ISO/IEC 17020** and the **Bangladesh Accreditation Board (BAB)**.
- **Ensure Impartiality:** Conduct all inspection activities—including Ambient Air, Stack Emission, Noise, and Water Quality testing—free from any commercial, financial, or other pressures that might compromise our professional judgment.
- **Maintain Technical Excellence:** Utilize "updated version" instrumentation (such as our high-precision benchtop lab units and specialized field sensors) and follow validated SOPs to ensure data representativeness.
- **Ensure Personnel Competency:** Systematically monitor and train our inspectors through on-site witnessing and regular competency assessments to prevent procedural drift.
- **Protect Client Interests:** Treat all information obtained during inspections as strictly confidential and maintain a transparent process for handling complaints and appeals.
- **Continuous Improvement:** Regularly review our technology through "Technology Gap Analysis" and update our Quality Objectives to ensure we remain at the forefront of environmental science.

The management of **GECL** ensures that this policy is communicated, understood, and implemented at all levels of the organization—from the field team to the laboratory.
